

The Louisiana Wetlands

Visiting the Children's Museum

Before Your Visit:

Children will discuss with their teacher which animals live in the Louisiana Wetlands. See Louisiana Wetlands: Color Sheets.

During Your Visit:

Stop by our Louisiana Wetlands exhibit and see about the different animals that make these low lying areas their home. Discover the unusual sounds of the local marsh birds by pressing a button. Challenge students to find fish and shellfish that live in the Calcasieu Estuary in our very own aquarium.

Post Museum Visit Activity:

The teacher may encourage children to talk about their personal experiences and sightings of the animals seen at the Children's Museum.

Activity Sheets:

Louisiana Wetlands: Crab Color Sheet

Louisiana Wetlands: Heron Color Sheet

Louisiana Wetlands: Counting Worksheet
