

Louisiana Industries

Visiting the Children's Museum

Before Your Visit:

Children will discuss the industries that support our State's economy, such as shrimping, fishing, forestry, farming and oil. See Louisiana Industries: Spelling Worksheet.

During Your Visit:

The student may visit our Shrimping Boat exhibit in the first floor, talk to other boats using the radio, put on white rubber boots and classify their catch in the Shrimping Corner! Afterwards, they can boil delicious shrimp and crab in the Cowboy Kitchen! Don't forget to experience a pirogue ride through the bayou!

Post Museum Activity:

The teacher may discuss with her students if they know someone that works in any of these industries; what exactly they do and what kind of equipment or tools they use.

Post Museum Activity:
